

17th CME Report

Date: 12th September 2020

Time: 2:30 pm – 3:30 pm

Speaker: Dr. Jenie R, Lecturer cum MO, JSSINYS.

Title: Mysteries of Protein Misfolding

Participants: Principal, all teaching faculty, interns, and final year students.

Session Type: Virtual through ZOOM platform

Dr. Jenie R elaborated on the normal mechanism of protein folding in the initial part. Then she explained the various etiology behind the cause of protein misfolding. She explained how each etiology played the main role in diseases that arise due to this misfolding. She also said about the relation of neuro-degenerative diseases like Alzheimer's, Parkinson's disease, to protein misfolding. The session ended with a question-answer session which enabled a deep understanding of the session.

Report prepared by

Dr. Preethi KS,

Lecturer cum MO.
